

Office Partitions

Tired of the mess, construction delays and costs of traditional building methods? National Partitions fully fabricated wall panels and modular systems substantially reduce mess and plant disruptions, install 75% faster than conventional methods, cost 33% less and give you the flexibility to meet your facility's needs.

National Partitions modular office systems include everything needed for an attractive, functional and code compliant workspace. From insulated wall panels and solid wood doors to UL listed modular wiring with snap together components and trim, our systems deliver superior value. They also feature steel components and trim that are expertly finished with durable vinyl using our exclusive TrueMatch process. The result is an attractive wall system that is stronger and much more versatile than traditional stick-build construction.

Each system is designed to specific commercial requirements, with superior manufacturing and materials and can meet tough sound control conditions, fire ratings and insulation needs. They are constructed using a modern, automated, high volume, continuous flow process that assures consistency and product of the highest quality. This system allows us to ensure on-schedule delivery anywhere in the world and we guarantee our interior products for 10 years.

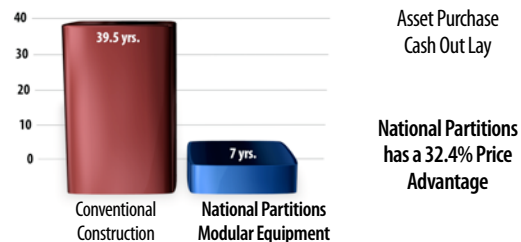

National Partitions Advantages

SEVEN-YEAR DEPRECIATION Substantial Cost Savings

One of the best advantages of National Partition's Office Systems is the ability to use fast seven-year depreciation rather than the 39.5 year depreciation of conventional construction. This provides a tremendous 32.4% cost advantage versus stick-built methods.

DEPRECIATED WRITE OFF Years

NON-PROGRESSIVE DESIGN Maximum Flexibility

What does non-progressive design mean? It's your ability to replace or exchange a panel(s) without disturbing adjacent panels. So, if a panel gets damaged or if you would like to relocate a door, you can move that panel independently and not have to remove the

panels on either side just to access it. This gives you maximum flexibility and saves you time and money. And it's only available from National Partitions.

WIREPAK

Our WirePak Modular wiring system allows the wiring of outlets and lights with snap-together simplicity. It's manufactured with heavy-duty, commercial/industrial grade components and is UL Listed and meets National Electric Code.

NO UGLY ZEBRA STRIPES

National Partitions' exclusive TrueMatch vinyl process for components gives your system an attractive, monolithic and conventional look. Don't settle for competitive products that feature mismatched or unfinished components that leave panel seams looking like "zebra stripes".

10 Year Warranty

Code Compliant

We meet all major building codes (ANSI, ICC, IBC, ICBO, UBC) with our modular systems.
